

Venetian blinds model Maxi Lux

Take off the decorative caps from both sides of the upper profile.

After attaching the profile tightly to the joinery, put 2 screws on each side.

Then put back the decorative caps on both sides of the upper profile.

Fixators of the blinds: They should be installed on both ends as illustrated. Afterwards the bottom profile should be clutched in the fixator.

Side guiding of the blinds: Plates should be installed in a way that allows the cord to hang vertically. The cord should be taken through the keg, it should be stretched and locked up with a screw.
