Roller blinds model Comfort, Comfort 40+

Installation on a wall

Mark the exact situation of the brackets and fix them with suitable screws. Use a level as the roller has to be installed horizontally.

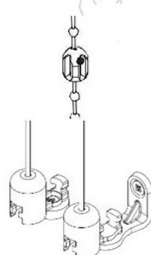

Installation on a ceiling

Mark the exact situation of the brackets and fix them with suitable screws

Place the roller with the fabric of the already installed brackets.

Fix upper and bottom position of the blinds with a detent on the control chain.

Side guiding with PVC plate should be installed in such a way that the cord stands vertical. The cord should pass through the ear of the bottom profile and the keg. It should be stretched and locked up with the screw in the keg.
