Roller blinds models Zebra Elegance, Elegance Plus

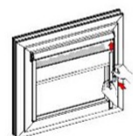

Take off the decorative caps on both sides of the box by pulling them forward.

Place the box in the upper part of the window so that the prongs touch the edge in the upper part of the glass holders. Make sure the blinds are in a horizontal position by checking with a level. Even a tiny slope will lead to improper winding of the fabric when moving the blinds.

After positioning the blinds, put screws on each side through the installation apertures in the brackets.

Clean the glass holders properly with a degreasing agent. Impose the guides right under the box before sticking them and if it is necessary to shorten them, you can cut them. Remove the protector of the double-glued strip. Place the guides right under the box and stick them to the glass holders.

Place the decorative caps on both sides of the box.

Fix upper and bottom position of the blinds with a detent on the control chain.
 (model Zebra Elegance)

Fix upper and bottom position of the blinds with a detent on the control chain.
