

## External venetian blinds model C 50

### Installation on a wall

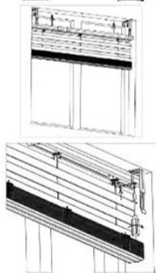

Place the plates so that they do not interfere with the mechanisms inside the profile of the blinds. Mark the exact situation of the plates and fix them with suitable screws.

### Installation on a ceiling

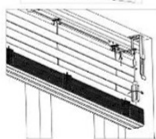

Place the plates so that they do not interfere with the mechanisms inside the profile of the blinds. Mark the exact situation of the plates and fix them with suitable screws.

Attach the blinds to the mounting plates.

Rotate the moveable splint of the plates and fix the blinds.

Side guiding of the blinds: Plates are installed in such a way that the cord stands vertical. The cord is taken through the keg, stretched and locked up with a screw.

In the top angle of the window, from the side where the control of the blinds should be, make an aperture with a drill.
