Installation guide

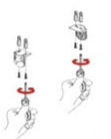

Roller blinds model Standard

Installation on a wall

Mark the exact situation of the brackets and fix them with suitable screws. Use a level as the roller has to be installed horizontally.

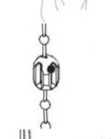

Installation on a ceiling

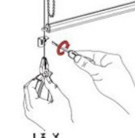

Mark the exact situation of the brackets and fix them with suitable screws.

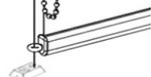

Attach the roller to the fabric of the already installed brackets and place the fixator.

Fix the upper and bottom position of the blinds with a detent on the control chain.

Side guiding with „Г“ metal plate should be installed in such a way that the cord stands vertical. The cord should pass through the ear of the bottom profile and the keg. It should be stretched and locked up with the screw in the keg.

Side guiding with PVC plate should be installed in such a way that the cord stands vertical. The cord should pass through the ear of the bottom profile and the keg. It should be stretched and locked up with the screw in the keg.
