The slats are made of natural wood and are heavier than aluminum blinds. Approximate weight:

- 25 mm – 2,3 kg/m²;
- 50 mm – 4 kg/m².

Height of the blinds in closed position – 1.5 cm for every 10 cm height of the blinds + 7 cm for the profiles.

Wooden blinds are a natural product, the structure and shades of the slats may vary up to 20% in regard to the color selector. This is a typical effect of the natural wood and is not a subject of reclamation.

When installing wooden blinds in a highly humid environment, distortion and cracking of the slats are possible.

If the blinds are exposed to sun for a long period, shading of the color of the slats is possible.
